One of the best ways to get the most from the Precision Board Plus you've purchased is to carefully plan out your "maximum yield strategy". Frequently, it will be more economical to bond more than one piece of Precision Board Plus to create unique shapes or thicknesses, versus building your sign from a single block. PB Bond-240 one-part urethane adhesive allows you to assemble your rough sign blank prior to final routing or shaping, creating a custom block that performs as if it were cast as a single piece.

PB Bond-240 is a versatile one-part urethane adhesive that is ready to use right out of the container (no mixing). It fully cures in 12 hours, allows for maximum working time, and you'll find many uses around your workshop. Great for both interior and exterior applications, PB Bond-240 also works well on wood, metal and most other materials. With PB Bond-240 on hand, you'll quickly see your leftover HDU turn into "usable inventory".

SOME ASSEMBLY REQUIRED

Dan Sawatzky's Triangle Contracting Co. Sign Takes First Place!

Dan Sawatzky's excavator is an excellent example of planning out a yield strategy and using PB Bond-240 urethane adhesive to put it all together. Working from a sheet of 1" thick PBLT-30 Precision Board Plus, Dan relies on his CNC router to cut the individual pieces to be laminated.

Sandwiching steel tubing for added structural support between the layers of Precision Board Plus, Dan assembles the pieces of the excavator using PB Bond-240. Note the use of coarse threaded screws and clamps to keep it all stationary during cure and to minimize bond lines.

And after plenty of careful attention is paid to final sculpting and finishing, the Sawatzky Imagination Corporation delivers another amazing award winning sign. This one took first place in Sign Media Canada's Stand Alone Sign category. To see more details of how this entire project came together, go to Dan's Speaking From Experience Blog.

Does your project require a higher density of Precision Board Plus that your distributor doesn't stock? No problem. Your distributor doesn't want to miss a sale and neither do we. We keep all Precision Board Plus densities in stock (see below) and, working with your distributor, will gladly drop-ship directly to you. Click here for help with your quote or call us with any questions at 800-845-0745.

Did You Know?

Coastal Enterprises also makes a one-part urethane adhesive that fully cures in 30 minutes. Check out PB Fast Set.

Interested in Having Your Company Featured in Our Newsletter?

You may have noticed we like to share interesting stories from our customers about their projects using Precision Board Plus. If you would like us to feature your company in one of these stories, we want to hear from you.

Here's what we're looking for:

- *In process photos working with Precision Board Plus*
- *Finished project photos*
- *Advice for those who are new to Precision Board Plus*
- *Tips for working with HDU*

Send us an e-mail at hdu@precisionboard.com along with any interesting details about the project.

These newsletters are sent to thousands of our customers and are a great way to build recognition for your company and share your expertise.

Certified Green

Precision Board Plus has been reformulated with eco-friendly, "Green" urethane components. The new Plus formulation has achieved a certified "Carbon Balance" of 3 to 1 and a "Rapidly Renewable Resource Content" of 18.9%. This major environmental improvement has also produced a tighter cell structure which results in more chips and less dust when cutting and machining.

Precision Board Plus now assists in meeting LEED requirements for obtaining USGBC and ICC 700 Building Credits.

Coastal Enterprises also offers a complete line of companion primers, adhesives and specialty coating products.

Call (800) 845-0745 or visit www.PrecisionBoard.com
