## SECTION VI - Environmental Information

---

**SPILL RESPONSE:** Observe precautions from other sections. Ventilate area. Contain spill. Cover with absorbent material. Collect spilled material. Clean up residue. Place in an approved metal container. Seal the container.

**RECOMMENDED DISPOSAL:** Cure product according to product instructions. Incinerate uncured waste in an industrial or commercial incinerator. Dispose of completely cured (or polymerized) material in a sanitary landfill.

**ENVIRONMENTAL DATA:** An epoxy resin produced by the condensation reaction of epichlorohydrin and bisphenol-A. These raw materials are consumed in the process. Residual levels of epichlorohydrin are typically 2 to 3 PPM.

Keep out of surface waters, sewers and waterways entering or leading to surface waters. Notify authorities if an exposure to the general public or environment occurs, or is likely to occur. The reportable quantity for a leak of this product is 50,000 lbs. which is based on the presence of epichlorohydrin an approximate of 2 to 3 PPM.

**REGULATORY INFORMATION:** Since regulations vary, consult applicable regulations or authorities before disposal. U.S. EPA hazardous waste number = None (not U.S. EPA hazardous).

**EPCRA HAZARD CLASS:** FIRE HAZARD: No                      PRESSURE: No
